

## CUTTING OF WIRE BY FRICTION

Company: Jaz Zubiaurre (Eibar, Spain)

Tools: Steel cutting rolls made of ASP2053 (powder-metallurgy HSS) to cut wire by friction (manufacturing of metallic brushes).

	<u>Before</u>	<u>With CRYOBEST®</u>
Number of operations between sharpening (average)	8.000	24.000

These cutting rolls are submitted to very harsh conditions (both thermally and mechanically). The rolls treated by Cryobest last three times more than the untreated ones.
