

CUTTING OF WOOD

Company: Beynel Manustock (France)

Tools: HSS chipper knives for wood used in the manufacturing of pallets.

	<u>Before</u>	<u>With CRYOBEST®</u>
Days between sharpening (average)	1	2
Material removed during sharpening (mm.)	≈ 0,3	≈ 0,2

The treated knives double their lives between sharpening. Due to a more homogeneous wear it is necessary to remove less material during sharpening (is is possible to obtain more uses from the same tool).
