

FATIGUE IN CLAMPS FOR MULTISPINDLE LATHES

Company: ZF Ansa Lemförder (Burgos, Spain)

Tools: Clamps for multi-spindle lathes (made of steel for springs). Machining of automotive components.

	<u>Before</u>	<u>With CRYOBEST®</u>
Average of working hours until failure (fatigue)	150	300

Apart from the reduction in the consumption of clamps, the productivity of the manufacturing line has increased (less downtime).
