

## RESISTANCE WELDING

Company: Batz S. Coop. (Igorre, Spain)

Tools: CuCoBe resistance welding electrodes. Welded union between C15K and DD11 steels.

	<u>Before</u>	<u>With CRYOBEST®</u>
Number of weldings	200	1200
Working time without changing electrodes	2 hours	12 hours

The performance improvement of the electrodes is highly dependent on the geometry. This was the better result obtained.
